(g) Applications for permit in a designated critical environmental area (CEA) on Town Zoning Map.

[1.] Upper Grandview and Environs & South Nyack Mountainous Area CEAs.

[a] Applications for a permit for new construction, additions or exterior modifications within these designated critical environmental areas shall be accompanied by a site plan which shows the existing contours (at two-foot intervals), all existing trees (as hereinafter specified), construction limit lines, all proposed construction and site alterations, drainage calculations and soils data as required by the Inspector. Said applications shall be referred by the Inspector to the Planning Board for site plan approval.

[b] Said applications shall be referred by the Inspector to the Rockland County Soil and Water Conservation District, which shall make specific requirements for erosion control during construction, and such erosion control requirements shall be a condition of a permit and shall be strictly enforced.

[c] Review by the Rockland County Soil and Water Conservation District may be waived, at the discretion of the Inspector, for sites having an average grade of 15% or less.

[d] In addition, all trees measuring eight inches in diameter at a height measured 54 inches from the ground, existing on any site within the designated Critical Environmental Area, for which an application for a permit has been submitted, shall remain as existing with the exception of those trees whose removal is deemed essential by the Inspector in order to implement the construction to be undertaken.

[e.] Those trees whose removal is deemed essential by the Inspector shall be marked by the Inspector below the chop line.

[f.] In determining whether a tree may be removed, the Inspector shall consider the following:

i. The necessity of removing the tree in order to allow reasonable economic use of the property.

ii. The effect of the removal on erosion, soil moisture retention and flow of surface waters.

iii. Whether the removal of the tree would substantially alter the water table or effect the stabilization of ground and surface water.

iv. Whether the topography of the area in which the trees are located is such that the removal of such trees will result in damage to the environment through erosion. Applications shall be made by the owner or lessee, or by agent of either, or by the architect, engineer or builder employed in connection with the proposed work. Where such application is made by a person other than the owner, it shall be accompanied by an affidavit of the owner that the proposed work is authorized by the owner and that the applicant is authorized to make such application. Each application for a permit shall be accompanied by the required permit fees and copies of plan documents, drawn to scale on durable paper, showing the location and size of all proposed new construction and all existing structures on the site, the nature and character of the work to be performed and the materials to be incorporated, distance from lot lines and, if required by the Inspector, the relationship of structures on adjoining property, widths and grades of adjoining streets, walks and alleys and details of structural, mechanical and electrical work, including computations, stress diagrams and other essential technical data, including approval of drainage by the Town Engineer or consulting engineers. Plans and specifications shall bear the signature of the person responsible for the design and drawings. Applications for uses requiring special permits from the Zoning Board of Appeals (or the Town Board) shall contain such additional information required for such Boards to make any special findings or additional requirements and conditions specified for any such use in Use Table, Column 3, or in § 4.3. Applications for uses subject to performance standards procedure shall contain such additional information set forth in § 4.121(c). Amendments to the application or to the plans and specifications accompanying the same may be filed at any time prior to the completion of the work subject to the approval of the Inspector. [Amended 7-13-2021 by L.L. No. 6-2021]

[2.] Hudson River CEA. This mapped area in the South Nyack Hamlet is generally east of Piermont Avenue and specifically in a polygon bounded by the entire easterly shoreline along the Hudson River, extending along the former northern boundary of the Village, as it extended along a line east of Cedar Hill Avenue, along the northerly property line of the February 2020 PID 66.46-2-11, plus on the eastern side of the centerline of Piermont Avenue, and along the former southern boundary of the Village of South Nyack, Piermont Avenue east to the River.

[a]. Traits.

- i. This CEA has unusual proximity to the Hudson River and the protection, preservation, and enhancement of important aesthetic and scenic qualities associated with such proximity is a primary goal.
- ii. The historic significance of the Hudson River CEA architecture should be protected for future generations.
- iii. The Hudson River's ecological, geological, and hydrological sensitivity may be adversely affected by any change, development, or disturbance and must be scrutinized carefully and thoroughly so as to protect and preserve not only environmental integrity of the riverfront area, but the appearance of the shoreline from the River itself.

[b]. Applications.

- i. Consistent with Conditional and Special Use requirements, as part of any site plan submitted for development in this CEA, a submission shall be accompanied by the following additional site plan data that will be depicted on such plans:
 1. Scale of one inch equals 40 feet, with topographic elevations spaced no greater than with one-foot contours, and using a NAV 88 Datum.
 2. Delineation of mean highwater mark of the Hudson River onsite and within any adjacent area must be shown; furthermore, as part of depictions of total lot area, any portions of underwater lands shall be uniquely identified.
 3. All structures shall be shown regardless of size and location.
 4. Supply two copies of color architectural elevations and cross sections of all proposed construction and showing as part of these, sides of buildings, along with specifications for colors, materials, and construction details.
 5. There shall be submission of a full Storm Water Pollution Prevention Plan (SWPPP) for any new nonresidential use, not including a professional office or studio that is within an existing building that is not changed and which also contains residences.
- ii. Within this CEA, any application involving a SEQRA Type I or Unlisted Action, shall be accompanied by a Full Environmental Assessment Form, compiled by the Applicant, including a visual EAF addendum, and this will need to be submitted for use in SEQRA administration.

[c]. Regulation.

- i. The erection or construction of dock, wharfs, or piers shall be referred by the Inspector to the Planning Board for site plan approval.
- ii. Merging two or more contiguous lots into one lot shall not be permitted except where all of the original lots to be merged are less than the minimum area required, in which case the proposed merger may be allowed upon site plan approval, but only for those original lots necessary to provide the minimum required area to the merged property.
- iii. Except for minor alterations or additions of less than 450 square feet that are exempted by the building inspection, physical additions of buildings and structures shall require site plan approval.

[d]. Development Criteria.

- i. The Hudson River shoreline and within fifteen-hundred-foot jurisdiction, measured perpendicular to the general flow of the river, shall be used only for boating, fishing, swimming, the operation of private seaplanes and similar water activities. Construction within this area shall be limited to piers, docks and similar structures which are commonly used for the above activities. No other building or accessory building of any kind shall be permitted. In no case shall it be permissible to fill the Hudson River beyond five feet of the present shoreline

- and then only in order to round out the existing shoreline. Where applicable, all construction and filling shall require approval of the United States Army Corps of Engineers or any other governmental agency having jurisdiction.
- ii. There shall be compatibility of any proposed dock or boathouse use with existing and proposed development.
 - iii. Design specifications for docks, rivetments, seawalls, and such structures shall be disclosed and accompanied by descriptions of how these are organized to provide for floodplain management and coastal resilience, by contemplating and mitigating the potential effects of wave action, through consideration of potential for sea level rise, and through identification of practicable practices deployed which aid or sustain natural resources values, such as by minimizing disruption to habitat and aiding the potential migration/ movement of wildlife.
 - iv. In conjunction with referrals to the Architectural & Community Appearance Board of Review concerning building character, the following criteria are provided to aid in an integration of building and land features so as to manage and enhance area character:
 1. Reviewer(s) should encourage a combination of common materials, landscaping, buffers, screens and visual interruptions in order to create attractive transitions between buildings of different architectural styles.
 2. Where possible, natural or existing topographic patterns, which contribute to beauty and character of a development, shall be preserved.
 3. Landscaping should contribute to the site plan and integrate the various elements of site design, preserving and enhancing the particular identity of the site, including architectural features, scenic vistas and visual corridors.

(A) In the SN-HRA District, up to three nonilluminated property organization identification signs with an area on a side of not over nine square feet.

(B) In the NS-RG-A, SN-R-O and Sn RG-OA Districts, provided that they are accessory to a principal use on the premises:

(i) One nonilluminated nameplate or professional sign per office with an area of not over two square feet.

(ii) One indirectly illuminated bulletin board or announcement or identification sign for educational or religious institutions, with an area on a side of not over 12 square feet, provided that such sign is located not nearer than 20 feet to any street or property line or is attached to the building if closer.

(iii) One indirectly illuminated identification sign, with an area on a side of not over 12 square feet, or in the RG-OA District, two nonilluminated identification signs with an area on a side of not over 24 square feet, provided that such sign is located not nearer than 20 feet to any street or property line or is attached to the building if closer.

(3) A rear yard adjoining any dwelling's property shall be minimum of 40 feet. Otherwise, it shall be equal to that required for a one-family dwelling.

§ 18.3. Supplemental Bulk Standards.

§ 18.31. Bulk standards for development of unsuitable land.

(1) Land which the Planning Board finds to be unsuitable for subdivision or development due to flooding, improper drainage, steep slopes, rock formations, utility easements or other features which will reasonably be harmful to the safety, health and general welfare of inhabitants of the land and surrounding areas shall not be subdivided or developed unless adequate methods are formulated by the developer and approved by the Planning Board, upon recommendation of the Town Engineer, to solve the problems created by the unsuitable land conditions.

(2) As part of any minimum lot area requirement and maximum lot coverage requirement, not more than 50% of any land under water, subject to or within the one-hundred-year-frequency floodplain, or designated wetlands shall be counted. In addition, at least 50% of the minimum lot area shall be unencumbered by land under water, the one-hundred-year-frequency floodplain or a designated wetland. Any construction on such land shall be limited to the maximum lot coverage calculated on the amount of countable square footage, if any.

§ 18.32. Development of hillsides.

(1) The future development of the hillside areas in the Hamlet of South Nyack is a problem of increasing urgency. The hillsides bypassed until now as too costly on which to build are virtually the last substantial areas for residential development in the Hamlet of South Nyack, and proposals for their use are beginning and can be expected to increase in the future. In the past, a large amount of cutting and filling was frequently done to get the maximum number of lots from a hilly piece of land. In the Hamlet of South Nyack, where steep hills are also characterized by droughty and shallow to bedrock soils, filling operations often entail the destruction of a great deal of the natural vegetation, disrupt the natural drainage pattern and cause excessive amounts of erosion. To prevent these problems and to preserve the present character of the Hamlet's hillside areas, the Planning Board shall use the following slope formula, based upon the existing contours of the land, to determine the lot area credit toward the minimum area requirement.

(2) Based upon the following table, the application of the minimum lot area requirements in Article III herein shall be limited by the percentage factors shown below:

<u>Slope* of Area Prior to Cut and Fill Operations</u>	<u>Percent of Lot Survey Area to be Credited to Meet Bulk Regulations for Each Lot</u>
<u>0% to 15%</u>	<u>100%</u>
<u>16% to 25%</u>	<u>60%</u>
<u>26% to 35%</u>	<u>40%</u>
<u>36% and over</u>	<u>0%</u>

*Note: Degree of slope to be certified by the applicant's licensed engineer, subject to review by the Town Engineer.

§ 18.33. Bulk requirements applicable to SN R-18, SN R-12, SN R-8H/R-12H, SN RG-6, SN RG-4, SN RG-A, SN RG-OA, and SN R-O Residence Districts. The following bulk requirements shall apply to the SN R-18, SN R-12, SN R-8H/R-12H, SN RG-6, SN RG-4, SN RG-A, SN RG-OA, SN R-O and SN RGLSO Residence Districts.

- (1) Accessory buildings. An accessory building may be located in any required side or rear yard required for the principal building, but shall not occupy more than 30% of the area of such required rear or side yard. Accessory buildings constructed at the same time may be located in pairs or groups in the required rear or side yard along the common side-lot line or rear-lot line of contiguous lots. No accessory use shall be located closer than 15 feet to any principal use.
- (2) Relation of accessory buildings to streets. No accessory building shall project nearer to the street on which the principal building fronts than such principal building. Should topographic conditions be such that practical difficulties would be caused by this requirement with respect to the location of a garage, the Planning Board may authorize the erection of such garage within not less than 10 feet of the street line where the natural slope of the ground within 25 feet of such line is between 12% and 20% and within not less than five feet of the street line where such slope within 25 feet of such line exceeds 20%.
- (3) Corner lots. On a corner lot, front yards are required on both street frontages, and one yard other than the front yard shall be deemed to be a rear yard, and the other or others, side yards. The minimum district requirements for each shall be complied with.
- (4) Exceptions to lot depth requirements. The minimum lot depth at any point may be decreased by the Planning Board through site plan review to 75% of the minimum requirement if the average depth conforms to the minimum requirement.
- (5) Exceptions to yard requirements.
 - (A) Permitted encroachments. Cornices or cantilevered roofs may project not more than two feet into a required yard. Belt courses, window sills and other ornamental features may project not more than six inches into a required yard.

(B) Existing setback. No proposed one-family or two-family dwelling need have a front yard greater than the average setback of the two adjacent existing dwellings if they are located within 50 feet on each side of said proposed dwelling, on the same side of the street and within the same block and the same district.

(C) Steep slopes. Where the presence of steep slopes would produce extraordinary site clearance, blasting, or removal of hillsides to meet yard requirements, the Planning Board may modify any yard requirement, up to 50% for any yard, provided that an equivalent area is provided in other yards on the same lot. In making a determination with respect to this subsection the Planning Board shall give consideration to the preservation of views from adjoining residences. Where the Planning Board has thus modified the yard requirement, any such yard shall thereafter be deemed to conform to the bulk and area requirements.

§ 18.34. Protection of right to sunlight. In order to protect access to sunlight for neighboring properties, along the northern-facing lot line of any parcel, for a minimum continuous distance of 25 feet, no structure, fence or building shall be built within 15 feet of the lot line with any part of it having a height greater than six feet above ground level.

§ 18.35. Maximum Building Height Applicability: In considering Maximum height per Hamlet of South Nyack General Use, Bulk & Parking Regulations, per Figure 1, when considering a front yard setback variance for any structure, allowable roof height to the topmost extremity shall not extend above a line drawn from 5 1/2 feet above the nearest point on the front lot line to a point 30 feet above the required front yard setback. An exception to this limit may be granted only if there is no other feasible alternative and if the balancing of benefits to the applicant if granted, versus benefits to the community if not granted, weigh strongly in favor of the applicant.

Figure 1. Maximum Building Height Envelope for Front Yard Setback Variance.

§ 18.36. Swimming pools. The following restrictions and regulations apply to the construction of all swimming pools.

- (1) A private pool structure and deck shall conform to setback regulations
- (2) A private pool structure and deck shall conform to setback regulations for an accessory building in the district in which it is located. The water container part of the pool structure shall be set back a minimum of 10 feet from all property lines. All other pools shall be set back not less than 20 feet from all property lines. The pool shall be screened from the neighboring property by use of shrubs, trees and other appropriate screening material.
- (3) Each application for site development plan approval to construct or erect a swimming pool, and/or a structure surrounding it, shall be accompanied by plans drawn to scale, large enough and in sufficient detail to show:
 - (A) A plot plan of the property on which the pool and/or structure is to be placed, showing location in reference to side lines, rear lines and other buildings on the lot.
 - (B) Pool dimensions, including depth.
 - (C) Specifications and plans of the structure.
 - (D) Wastewater disposal and electrical wiring.
 - (E) An estimate of cost of pool and/or structure.
 - (F) The location of the fence.
 - (G) Whether the pool is for "private" or "other" use.
 - (H) Lighting plans, if any.
 - (I) A grading plan.
- (4) No swimming pool or related structure shall be constructed or erected unless a building permit has been issued therefor by the Building Inspector.

§ 18.4. Special or conditional permit uses – Hamlet of South Nyack.

§ 18.41. Private schools; private education campuses; and philanthropic and charitable institutions. The following requirements apply to private schools; private education campuses; and philanthropic and charitable institutions:

- (1) Private schools.
 - (A) Any private school for more than 100 students shall occupy a lot which shall have an area of not less than two acres.
- (2) No building or part thereof shall be erected nearer than 20 feet to any street or property line. Any sports or athletic facility building or part thereof shall not be erected nearer than 150 feet to any street or property line which abuts another use.

SN-R-4A ONE-FAMILY HISTORIC RESIDENCE	In order to preserve the unique historical and architectural character of the property currently known as 122 Franklin Street, identified on the former Village of Soth Nyack Tax Map as Sec. 66.45, Block 3, Lot 27, this district requires four acres per lot. To encourage and facilitate the maintenance of this unique property in its historic state, a broader range of uses and greater intensity of use is allowed insofar as the property can absorb these because of its unusually large size. Up to eight accessory structures are allowed per four-acre lot. Three accessory structures, known as the "barn," "summer kitchen" and "pool house" on proposed master plan dated 6-5-2004, may include habitable space, not to exceed 1,300 square feet each, and subject to site plan approval by the Planning Board. The number of special permit uses allowed on the property is as allowed in this Article. To the extent that the provisions of this bulk table for District SN-R-4A may conflict with other regulations of this chapter with respect to bulk or use, the provisions in this table shall have controlling precedent.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Project :

Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency’s reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

MEMORANDUM

TO: Town of Orangetown Town Board

CC: Robert Magrino, Town Attorney

FROM: Laberge Group

RE: Response to Public Comments on Zoning Proposal for the South Nyack Hamlet (Local Law of 2022 Amending Chapter 43 of the Town Code)

DATE: June 24, 2022

This zoning amendment would modify the Town Zoning Law and Zoning Map by adding new zoning districts, a table of regulations, definitions, supplemental standards, and other regulating criteria covering the South Nyack (SN) hamlet area, which is now directly part of the Town due to formal dissolution of the Village earlier this year.

This memo provides potential recommendations and responses to this select items brought up in the General Municipal Law Review (GML 239 L & M) by the Rockland County Department of Planning that were supplied in a four page letter dated May 12, 2022 and referenced by the County as O-2442. The County's letter is attached for reference. The 16 items below address items listed under the "Recommend the Following Modifications" heading in the County's letter, which are covered on its pages one through three.

POTENTIAL RESPONSES TO ROCKLAND CO. DEPT. OF PLANNING MAY 12, 2022 COMMENTS TO RECOMMEND THE FOLLOWING MODIFICATIONS

- 1) Rationale for an override is, there has been reconsideration of the proposed modification to include the Run-Off CEA on the Zoning Map. Reasons why the Run-Off CEA was not included are:
 - A. There was not a Map actually contained in the Villag Zoning law in association with §330-11.
 - B. State law at 6 NYCRR 617.14(g) provides for filing of documentation on a Critical Environmental Area (CEA) directly with the New York State Department of Environmental Conservation (DEC); however, there is not a CEA map online with DEC at <https://www.dec.ny.gov/permits/6184.html>
- 2) Reason(s) why this CEA was reduced in area between the second and fourth revisions of the map are:
 - A. There was not a Map actually contained in the Villag Zoning law in association with §330-11.
 - B. State law at 6 NYCRR 617.14(g) provides for filing of documentation on a Critical Environmental Area (CEA) directly with the New York State Department of Environmental Conservation (DEC); however, there is not a CEA map online with DEC at <https://www.dec.ny.gov/permits/6184.html>
 - C. Given the regulatory framework of the Town, a stated reason why this CEA was reduced in area is there is an interest in focusing the potential area on where there is SEQRA consideration
- 3) This proposed Local Law is focused on the footprint encompassing the former Village of South Nyack. There are not resources allocated for area planning within other parts of the community in conjunction with this initiative. There is concurrent Town-wide planning to update the 2022 Orangetown Comprehensive Plan. As

the legislative body that will consider Comprehensive Plan adoption, the Town Board may use that planning process to determine whether other portions of the Town may be considered for designation as CEA.

- 4) The term noted as incorrectly labeled is changed to “Swimming Pool Structure” within the local law, so that it is corrected. The definition from the former Village Zoning for “Swimming Pool” is also be placed in the local law as applicable to the area within the former Village. While the Town has preliminarily considered undertaking this more complete definition town-wide; the Town does not have resources assigned at this point to make a fuller zoning change. The rationale for an override is, considering there may be zoning changes advanced in conjunction with the new comprehensive plan, this could be a topic to consider for adoption within that future process of updating the whole comprehensive zoning law.
- 5) There rationale for the override is there are many regulations in the existing zoning of the Town of Orangetown which regulate the use of property absent specific regulations applicable within the South Nyack sub-zones. See for instance – existing Town Zoning Article IV ‘Additional Use Regulations’. Not carrying over these regulations streamlines the review of development and it aids and objective to generally regulate properties of similar types uniformly.
- 6) The basis for an override is there are some basic sign standards proposed for establishment and there was consideration for including these specific regulations; yet, it is contemplated that the existing Town general standards in Zoning and in the Town Code would be sufficient.
- 7) The error is acknowledged and there has been changes in the content and codification at this point of the proposed local law.
- 8) There was reconsideration of restoring items identified. It is our recommended determination that in existing Town code s there exists an equivalent regulation of ‘Obstructions to vision at street intersections’ standard, so it is deemed not necessary to restore it. Side yard adjustment for lots providing more than minimum required street frontage is considered to be a difficult to regulate standard, so it was not restored and there will be monitoring of land use performance and regulation and consideration to potentially establish future regulations. The ‘bulk requirements applicable to places of worship’ were put into the proposed local law, at §18.24.
- 9) There was consideration to make the stated change; however, there was a decision not to effectuate it, but use the established framework available within the Town’s existing regulatory framework. The term “Special Permit Granting Authority (SPGA)” was removed from §18.42 and the term ”Board” was used. This was also substituted for that phrase in §18.44.
- 10) The standard for 300 feet of river frontage was added as to §18.4. Special or conditional permit uses, as §18.47 and there is a minimum parking standard that is generally the same as was applicable in the former Village.
- 11) The bed-and-breakfast standard was not carried forward. Understanding is there are not any existing B&B uses; yet, if there were one(s) lawfully established, non-conforming use regulations would be applicable.
- 12) There has been an adjustment in the applicable code standards – see § 18.41 and adjustments in the applicable schedules components (in §3.13, 43 Attachment 19.1 – 19.9).
- 13) Some basic supplemental regulations that were drawn from South Nyack’s former zoning are now provided and are meant to serve until such time as there may be a decision to upgrade these regulations for signs.

- 14) The Code of the Town of Orangetown and general zoning standards will be used for this type of regulation until such time as there may be a decision to upgrade these type standards. It is registered that the dimensional and performance regulations may in the future need upgrades to deal with topics unique to the hamlet, like for loading and aisle widths.
- 15) As noted, the Town is establishing standards for South Nyack which will serve for the foreseeable future. Comprehensive planning is an appropriate process to use for identifying desired zoning changes. There is contemplation underway to define if this will be part of the content recommendations in a plan that will subsequently be presented for adoption and it could be part of potential subsequent zoning amendments.
- 16) A best effort was made to identify the entities to engage in this process any party also was notified of the proceedings through other notification steps, including the publication of the notice of the hearing on this zoning modification.

CONCLUSION

Our understanding is that no comments were made by the Town Planning Board on this proposed local law. Therefore, there are no necessary considerations or responses per Town Zoning Article X, §10.5.

One piece of correspondence was forwarded to Laberge Group on “The History of South Nyack Through the History and Rediscovery of the South Nyack Brook Please Use This Version...”. It is our recommendation that this is valuable background information on this location, but there is not specific commentary in the correspondence on the proposed “Hybrid Zoning”, so we simply register receipt of that information.

We look forward to any further questions of comments. Town staff was supplied with identified adjustments in the Local Law proposal.

Re: GENERAL MUNICIPAL LAW REVIEW: Section 239 L and M

Map Date:

Date Review Received: 4/15/2022

Item: TOWN OF ORANGETOWN - ZONING IN SOUTH NYACK (O-2442)

Local Law to adopt zoning regulations for the Hamlet of South Nyack. Certain provisions of the former Village of South Nyack's Code will also be repealed.
Hamlet of South Nyack

Reason for Referral:

County and State highways and parks; Long Path Hiking Trail; adjacent municipalities

The County of Rockland Department of Planning has reviewed the above item. Acting under the terms of the above GML powers and those vested by the County of Rockland Charter, I, the Commissioner of Planning, hereby:

****Recommend the following modifications***

1 The former Village of South Nyack was split into three Critical Environmental Areas (CEA): Hudson River Area, Run-Off Area, and Mountainous Area. The Hudson River and Mountainous Areas have been included in the new portion of the Orangetown zoning code, however the Run-Off Area was omitted from the zoning amendment and the March 21, 2022 map of the hamlet (revision #4). On April 28, 2022, the Town Attorney sent our department an older map that was dated March 3, 2022 (revision #2) and included the Run-Off CEA. This CEA is shown on the previous map to extend between South Broadway and Route 9W and is unique in that the steep hillsides to the west result in significant water run-off and drainage concerns. The NYS Thruway also runs through this area, making pollution, noise, and traffic additional concerns. It must be stated why the Run-Off CEA was not included, and reconsideration should be made to also include this section of the hamlet. If the CEA is returned to the official map, the Town shall ensure that the Run-Off CEA is also added to Section 10.233(g) of the Town Code, and that all appropriate traits, regulations, and development criteria are included. The Town of Orangetown zoning map shall also be updated to include this CEA as part of the Orangetown Critical Environmental Area.

2 Section 4 of the Local Law describes the proposed western boundary for the Hudson River CEA to be along the eastern side of the centerline of Piermont Avenue. This is also depicted on the March 21, 2022 map. However, in the former Village of South Nyack, the western boundary was along the western side of the centerline of South Broadway. The March 3, 2022 map also reflected the former Village's boundary of the CEA. It must be stated as to why this CEA has been reduced in area between the second and fourth revisions of the map.

TOWN OF ORANGETOWN - ZONING IN SOUTH NYACK (O-2442)

3 The Town Board should take this opportunity to determine whether the Hudson River CEA could be modified to include other portions of the Town, particularly the area along the Hudson River between Tallman Mountain State Park and Palisades State Park.

4 Section 18.12 of the Local Law provides definitions for terms that are defined in the South Nyack Zoning Code, but not in the Orangetown Zoning Code. One of these terms is "swimming pool." However, the definition provided is for "swimming pool structure" from the South Nyack Code. The term should be corrected in the amendment. In addition, the Orangetown code only provides a definition for "swimming pool, private." South Nyack included a general definition for a "swimming pool," and further broke it down into "swimming pool, private" and "swimming pool, other." The Town should consider adopting this more complete definition.

5 Section 18.2 of the Local Law imports some of the supplemental use regulations found in Article VI of the South Nyack zoning code. However, only two of the 18 sections have been brought over to the Orangetown Code: "Sale of arts, crafts & antiques; general or professional office" and "Community residence facilities." Some of the other provisions, such as "Business hours of operation" are already regulated within the Town's code and are therefore, not included, and "Swimming pools" has been moved to the section for supplemental bulk regulations. However, others such as "Use of water rights" and "Protection from glare" are not covered in the Orangetown code and regulations for "Parking of commercial vehicles" and "General and professional offices, funeral parlors and sale of arts, crafts and antiques in the RG-OA [now known as SN_RG-OA] Districts" apply to specific districts that only exist in the hamlet of South Nyack. It must be stated why these sections, as well as the other supplemental use regulations, have not been included in the Local Law, as they are important regulations that should be kept.

6 Section 18.21 regulates the "Sale of arts, crafts & antiques; general or professional office." The South Nyack Code included provisions for signage and hours for the sale of arts, crafts, and antiques, neither of which appear in the Local Law. These additional regulations are important in maintaining the character of the hamlet and should be included in the amendments.

7 Section 18.23 is titled "xx" and does not include any text. This shall be removed.

8 A majority of the supplementary bulk regulations found in Article VII of the South Nyack Zoning Code have been included in Section 18.3 of the Local Law. However, "Obstructions to vision at street intersections," "Bulk requirements applicable to places of worship," and "side yard adjustment for lots providing more than the minimum required street frontage" have not been incorporated in the amendment. Regulations such as the obstructions to vision at street intersections are important in an area like the Hamlet of South Nyack where it may be difficult to see whether there are other vehicles approaching an intersection due to the incline of most streets, particularly given the pedestrian activity in the heart of the hamlet center. The Town should reconsider also adding these important supplementary bulk regulations to the amendments.

9 Article VII of the Orangetown Zoning Code establishes the procedures for conditional uses on approval by the Planning Board. Although the Town grants special permits through the Town Board and Zoning Board of Appeals (ZBA), there is no portion of the zoning code that details the procedures for granting special permits. To that end, the Town shall consider adopting Sections 330-38 through 41 of the South Nyack Code, or a modified version thereof. These sections define the Special Permit Granting Authority (SPGA) and their powers and duties (the SPGA is mentioned in Section 18.42 and 18.44 of the Local Law without being formally established in the Orangetown Code), as well as procedures for granting special permits and requirements applicable to all special permit uses. This will only strengthen Orangetown's Code by explicitly establishing the powers of the Town Board and ZBA as special permit granting authorities, as well as the procedures under which they can grant these permits. Setting these requirements for all special permit uses also holds these uses to a higher scrutiny by the SPGA, similar to Section 8.1 of the Orangetown Zoning Code that includes the general standards for conditional uses.

TOWN OF ORANGETOWN - ZONING IN SOUTH NYACK (O-2442)

10 The special or conditional permit uses for the Hamlet of South Nyack, found in Section 18.4 of the Local Law do not include the regulations for private boat or yacht clubs or bed-and-breakfast establishments. However, the Table of Hamlet of South Nyack General Use, Bulk & Parking Regulations indicates private boat or yacht clubs are a special permit use in the SN_R-12 zoning district. The special permit requirements for this use must therefore be included in Section 18.4.

11 As noted above the special or conditional permit uses do not include bed-and-breakfast establishments. This use also does not appear on the Table of Hamlet of South Nyack General Use, Bulk & Parking Regulations, but was permitted in several zoning districts in the former Village. If this was an oversight, it must be added back to the Table, and the special permit regulations for the use added to Section 18.4. If bed-and-breakfasts are no longer permitted in the new hamlet, it must be stated whether any existing establishments will be permitted to operate as a non-conforming use.

12 The Table of Hamlet of South Nyack General Use, Bulk & Parking Regulations lists private schools and private educational campuses as separate uses. Private schools are a special permit use granted by the Zoning Board of Appeals and are subject to the requirements of Section 18.41. Private educational campuses are special permit uses granted by the Town Board, but are not subject to specific special permit requirements. The former Village of South Nyack Zoning Code previously included special permit requirements for these campuses, but has since repealed them. The Town shall continue to require a special permit for private educational campuses, and should consider establishing special permit standards specific to this use.

13 Orangetown regulates signage through Chapter 31C of the Town Code, as well as for individual zoning districts in Column 5 of the Table of General Use Regulations. Article IX of the South Nyack Zoning Code regulated signs in the former Village, and has not been brought over in the Local Law. The Table of Hamlet of South Nyack General Use, Bulk & Parking Regulations also does not include regulations for signage in the new hamlet. Article IX from the South Nyack Zoning Code must be included in the Orangetown Code to regulate signs in the new zoning districts established for the Hamlet of South Nyack, or Chapter 31C of the Orangetown Town Code must be amended to include such.

14 Article X of the South Nyack Zoning Code regulated off-street parking and loading facilities and driveways. This was not included in the Local Law since the Table of Hamlet of South Nyack General Use, Bulk & Parking Regulations established parking requirements for each use in the new hamlet and Article VI of the Orangetown zoning code currently includes provisions for off-street parking and loading. The remainder of Article X of the South Nyack Zoning Code also provides differing regulations from Article VI of Orangetown's zoning code. The Town Board must determine whether all or some of these different requirements should remain in place for the Hamlet of South Nyack.

15 Included on the bulk table for South Nyack is the lot coverage standard. This standard has been kept for the Hamlet on the Table of Hamlet of South Nyack General Use, Bulk & Parking Regulations. Lot coverage is an important regulation since it limits the amount of impervious surface on a site, thereby preserving (or establishing) greenspace and reducing run-off. The Town currently does not have a lot coverage standard. This must remain in place in the Hamlet of South Nyack in the future. In addition, the Town should use this opportunity to establish a lot coverage standard for the existing zoning districts throughout the Town. Now is an ideal time to develop this standard as the Town of Orangetown is currently undergoing an update to the Comprehensive Plan.

16 Resolution No. 180 provides a listing of interested or involved agencies for the adoption of the proposed zoning regulation. This list must be expanded to include the following agencies, since facilities under their jurisdictions are either within the Hamlet of South Nyack or within 500 feet of its boundary: New York State Department of Environmental Conservation; New York State Department of Transportation; New York State Thruway Authority; New York-New Jersey Trail Conference; Palisades Interstate Park Commission; and Rockland County Division of Environmental Resources. In addition, the Referral Agencies listed on the Referral Form for General Municipal Law (GML) Reviews should be expanded to include the above listed agencies.

17 The following additional comments are offered strictly as observations and are not part of our General Municipal Law (GML) review. The board may have already addressed these points or may disregard them without any formal vote under the GML process:

TOWN OF ORANGETOWN - ZONING IN SOUTH NYACK (O-2442)

17.1 The Lead Agency Coordination Letter from the Town of Orangetown, dated April 15, 2022, states that the Town Board has determined that the amendment to Chapter 43 by adding Article XVIII for zoning in the Hamlet of South Nyack is an "Unlisted" action under the State Environmental Quality Review Act (SEQRA). However, Resolution 180 states that the proposed action was determined to be a "Type I" action. Section 617.4(b)(1) of the SEQRA regulations indicates that the initial adoption of a municipality's comprehensive zoning regulations is one of the criteria for a Type I action. Therefore, it seems that the adoption of the zoning regulations for this new section of the Town of Orangetown would meet this criterion. All information must be consistent. The Town must amend the appropriate document to cite the correct SEQRA action.

17.2 Resolution No. 180 lists the involved and interested agencies in the review process for the amendment of the Town's zoning ordinance. The Town of Ramapo is listed as one of the municipalities. It is not clear why this municipality is listed since it does not abut, nor is within 500 feet of, any portion of the Town of Orangetown or the Hamlet of South Nyack.

17.3 The Referral Form for the GML Review indicates that the lot acreage for the application is 0.46 acres. It is unclear as to what this is referencing since a new Article is being amended to Chapter 43, which includes the Hamlet of South Nyack in its entirety. This must be corrected.

"NYS General Municipal Law Section 239 requires a vote of a 'majority plus one' of your agency to act contrary to the above findings. The review undertaken by the Rockland County Planning Department is pursuant to, and follows the mandates of Article 12-B of the New York General Municipal Law. Under Article 12-B the County of Rockland does not render opinions, nor does it make determinations, whether the item reviewed implicates the Religious Land Use and Institutionalized Persons Act. The Rockland County Planning Department defers to the municipality forwarding the item reviewed to render such opinions and make such determinations if appropriate under the circumstances.

In this respect, municipalities are advised that under the Religious Land Use and Institutionalized Persons Act, the preemptive force of any provision of the Act may be avoided (1) by changing a policy or practice that may result in a substantial burden on religious exercise, (2) by retaining a policy or practice and exempting the substantially burdened religious exercise, (3) by providing exemptions from a policy or practice for applications that substantially burden religious exercise, or (4) by any other means that eliminates the substantial burden.

Proponents of projects are advised to apply for variances, special permits or exceptions, hardship approval or other relief.

Pursuant to New York State General Municipal Law §239-m(6), the referring body shall file a report of final action it has taken with the Rockland County Department of Planning within thirty (30) days after final action. A referring body which acts contrary to a recommendation of modification or disapproval of a proposed action shall set forth the reasons for the contrary action in such report.

Mike,

Just wanted to send some extra info your way for the Chiefs meeting next week. Customers have used this info to make sure their towns can justify using ARP funding for equipment...The most beneficial is the below note and attached SLFRF document...

1. Department of Treasury FINAL RULE

1. Provides overall guidelines on how ARP funding can be used/spent
2. Pages 60-61 (Eligible Capital Expenditures)
 1. ***“Acquisition of equipment for COVID-19 prevention and treatment, including ventilators, ambulances, and other medical or emergency services equipment;”***
 2. This is the best document to use to provide purchasing with the peace of mind knowing these are justified purchases with this money.

Dear valued customer,

Based on the required regulatory applicability of certain products during the COVID-19 pandemic, please review the following information regarding Stryker's LIFEPAK® CR2 defibrillator, LIFEPAK 1000 defibrillator and HeartSine® Connected AEDs.

These devices are designed with your organization in mind, ensuring ease of use, durability and advanced CPR technology. AEDs are an important tool to have when treating out-of-hospital sudden cardiac arrests.

Some key benefits of these devices that are applicable to the COVID-19 pandemic include:

- Remote monitoring capabilities: Since many organizations are working remotely and not in the facility where their AEDs are deployed, remote monitoring is particularly valuable during the COVID-19 pandemic (applicable for connected devices with LIFELINKcentral™ AED Program Manager only).
- Readiness for essential businesses: All Stryker AEDs perform regular self-tests and connected AEDs use the power of Wi-Fi® to provide readiness information.
- ECG monitoring (only applicable to LIFEPAK 1000 with optional 3-lead ECG monitoring): In addition, there is some early indication that COVID-19 patients may be at increased risk for myocardial injury due to the viral impact on cardiac function, especially in those with known heart disease.¹

Please visit strykeremergencycare.com for more information on the LIFEPAK CR2, LIFEPAK 1000 and HeartSine AEDs.

Sincerely,

Chris Walsh
